

Defence & Homeland Security Project References

- ST Electronics (Info-Comm Systems) was awarded a S\$44m contract to build a Third Generation Command And Control System for the Singapore Police Force.
- ST Electronics (Info-Comm Systems) was awarded a contract worth about S\$100m to provide the Advanced Combat Man System (ACMS) to the Singapore Armed Forces.
- ST Electronics (Info-Software Systems) was awarded a S\$34m contract to build a Command & Control System for the Singapore Civil Defence Force.
- ST Electronics (Info-Comm Systems) was awarded a \$7.8m contract by the Singapore Police Force to provide customised Forward Command Vehicles (FCV) with state-of-the-art communication and electronics systems.
- ST Electronics (Info-Comm Systems) was awarded a \$4m contract by the Singapore Prison Service to provide the network infrastructure for its Changi Prison Complex (CPC) Cluster B.
- ST Electronics (Info-Comm Systems) was awarded a S\$3.5m contract by the Maritime Port Authority (MPA) of Singapore to design, develop and implement a Harbour Craft Transponder System for the identification and monitoring of all licensed harbour and pleasure crafts by MPA and security agencies.
- ST Electronics (Info-Software Systems) was awarded a contract to supply the Shenzhen Police with a Command & Control System – Police Resource Incident Management Executive System (PRIMES).
- ST Electronics (Info-Comm Systems) was awarded a contract by the Taiwan National Fire Agency to provide Forward Command Vehicles with communication and electronics systems.
- The Hong Kong Fire Services Department awarded ST Electronics (Info-Software Systems) a US\$56 million contract to provide a Third Generation Mobilising System.
- ST Electronics (Info-Comm Systems) was awarded a contract to provide an Integrated C3 Network for Singapore's Ministry of Home Affairs' Home Teams.
- ST Electronics was awarded a contract by Singapore Police Coast Guard for the provision of HF and VHF/UHF radio system.
- ST Electronics was awarded a contract by Singapore Police Force for the provision of an outdoor digital wireless video surveillance system.
- ST Electronics was awarded a contract to upgrade a Card Access and Emergency Voice Communication System for National Institute of Education.
- ST Electronics was awarded a contract to design, supply, install, test & commission a fully operational Integrated Security System (ISS) for the security upgrading for Tanah Merah Prison

- ST Electronics was awarded a contract to supply, install, test & commission Building Security Systems for Maqam 2 and Fataj Hazza, Dubai
- ST Electronics was awarded a contract to design, supply, install, test & commission Airfield Ground Lighting Control and Monitoring System for Singapore Changi Airport
- ST Electronics was awarded a contract to supply, install & commission an Alert Alarm System for Housing & Development Board, Singapore
- ST Electronics was awarded a contract to provide Accreditation and Access Control System for 2010 and 2011 Formula 1, Singapore Grand Prix
- ST Electronics was awarded a contract to supply and install an Intelligent Building Management System & Security System for Seletar Airport's Traffic Control Tower
- ST Electronics was awarded a contract to install a Security System for Marina Bay Financial Centre Phase II
- ST Electronics was awarded a contract to supply, install, test and commission a Building Automation System and Fire Alarm System for Central Provident Fund Board
- ST Electronics was awarded a contract to supply, install, test and commission a Closed-Circuit Television System for National University of Singapore
- ST Electronics was awarded a contract to supply, install, test and commission a Pre-paid smart card system for Air-Conditioning Usage for Nanyang Technological University.
- ST Electronics was awarded a contract to upgrade Integrated Security Management, Card Access & Video Intercom Communication Systems and procurement of additional Card Readers & CCTV for Capital Tower, CapitalLand Commercial Management Pte Ltd
- ST Electronics was awarded a contract to supply, install, test and commission an Integrated Security Management System for Khoo Teck Puat Hospital
- ST Electronics was awarded a contract to provide a Security System for 21st Century Tower in Shanghai
- ST Electronics was awarded a contract to supply, install and maintain a Fire Alarm System for Singapore Changi Airport Terminal 1
- ST Electronics was awarded a contract to provide an Integrated Security Management System for Thai Airways
- ST Electronics was awarded a contract to provide a Terminal Access Control System (TACS) for Port of Singapore Authority Corporation
- ST Electronics was awarded a contract to provide an Integrated Security Management and Parking Guidance Systems for Dubai Festival City (c/w CCTV & ACS)
- ST Electronics was awarded a contract to provide an Intelligent Building Management System, Network Infrastructure and Integrated Security Management System for Grand Indonesia Mall, Office, Apartment and Hotel Tower in Jakarta.

- ST Electronics was awarded a contract to supply, install, test and commission a Contactless SmartCard Access Control System at Temasek Polytechnic
- ST Electronics was awarded a contract to upgrade a Security Access Control System for Nanyang Technological University
- ST Electronics was awarded a contract to design, supply, install, test and commission a Security Management and Access Control System for Kaohsiung MRT Lines, Taiwan
- ST Electronics was awarded a contract to supply, install, test and commission a Security system for the Teaching & Lab facility at Nanyang Technological University
- ST Electronics was awarded a contract to supply, install, test and commission a Parking Guidance System for Suntec Convention Centre, Singapore
- ST Electronics was awarded a contract to supply, install, test and commission a Security and Fire Detection System for the Old Souq, Qatar
- ST Electronics was awarded a contract to supply, install, test and commission a Security Access Control System for Changi Airport Terminals
- ST Electronics was awarded a contract to supply, install, test and commission a Security System for Singapore Embassy in New Delhi, India
- ST Electronics was awarded a contract to Upgrade a Seismic System for Meteorological Services Division, Singapore
- ST Electronics was awarded a contract to supply, install, test and commission an Integrated Security Management System for Woodlands Checkpoint, Immigration and Checkpoints Authority, Singapore
- ST Electronics was awarded a contract to supply, install, test and commission an Integrated Security Management System for Tuas Checkpoint, Immigration and Checkpoints Authority, Singapore
- ST Electronics was awarded a contract to supply, install, test and commission an Integrated Security Management System for Changi Prison.
- ST Electronics was awarded a contract to design, supply, install, test and commission a Contactless SmartCard Based Access Control System for National University of Singapore
- ST Electronics was awarded a contract to design, supply, install, test and commission an Integrated Security Management for Singapore Management University
- ST Electronics was awarded a contract to design, supply, install, test and commission a Smartcard and Kiosk Applications for the first Institute of Technology Education Regional Campus
- ST Electronics was awarded a contract to design, supply, install, test and commission a Security CCTV System Building and Access Control System for ST Marine's Shipyard
- ST Electronics was awarded a contract to design, supply, install, test and commission a Building Automation System for Singapore Changi Airport Terminal 2

- ST Electronics was awarded a contract to design and supply an additional Security Management and Access Control Systems for School of Bio-Science, Nanyang Technological University
- ST Electronics was awarded a contract to design, supply, install, test and commission an Electronic Identification & Access Control System for Prime Mover & Container at Port Authority of Singapore
- ST Electronics was awarded a contract to design, supply, install, test and commission an Integrated Security and Communications Systems for Tanah Merah Prison and Changi Women's Prison
- ST Electronics was awarded a contract to design, supply, install, test and commission a Security and Communications Systems for Singapore Expo (previously known as Singapore Mega Exhibition Centre)
- ST Electronics was awarded a contract to design, supply, install, test and commission an Extra Low Voltage Systems complete with Building Management and Integrated Security Systems for Suzhou Industrial Park International Building
- ST Electronics was awarded a contract to design, supply, install, test and commission an Extra Low Voltage Systems complete with Intelligent Building Management System, Building Automation System, Security Management System, CCTV System, Structural Cabling, PA & Fire Alarm System, PABX and Carpark System, for Shanghai 88 storey Jin Mao Hotel and Office Buildings.
